*** STAT 2013 - required for Accounting, Economics, and Finance majors; elective for all other majors.

The Spears School of Business offers a Bachelor of Science in Business Administration (BSBA) degree in these majors:

Accounting: We are helping to build the future of accounting to create a more prosperous society. No matter your career objectives, we have a major option that's for you, whether that is becoming a trusted CPA, consultant, accountant, manager, or analyst.

Data Analytics: Data Analytics provides skills needed to be a data analyst, business intelligence analyst, and/or data scientist. These skills are critical to all businesses and include database management, data wrangling technologies, advanced data visualization tools, and more.

Economics: Economics is based on simple principles which are used to model decision-making in a wide variety of fields of study and to analyze and predict both intended and unintended consequences of human action. We address the pressing issues confronting contemporary society such as environmental policy, education, tax structures, public health, and globalization.

***Entrepreneurship:** Our entrepreneurship program focuses on four areas: developing an entrepreneurial mindset, learning how to launch a business, learning how to manage and grow a small or family business, and leading change in an existing organization.

***Finance:** Finance focuses on financial decision making, corporate financial management, the markets, institutions, and instruments that facilitate the transfer of money and wealth, allocation of resources, insurance, and financial capital.

***General Business:** The General Business degree is offered for transfer students who are interested in various aspects of business but want to maintain flexibility to explore degree options and offerings across the Spears School of Business.

Hospitality & Tourism Management: HTM students are provided with high caliber business-based curriculum to prepare for careers in multiple sectors in the U.S. and globally and serve as a strong industry liaison for internships and job placement opportunities resulting in a tremendous career advantage for students.

International Business: International Business is an inter-disciplinary program that explores how business intersects with culture, diversity and language. One of the biggest advantages of the program is its realization that all business is international business and students must familiarize themselves with the global business environment.

***Management:** Management uses theory and application to solve problems in leadership dynamics, organizational behavior, and the development of management systems in order to best support the organization's goals and objectives. Management has degree options which are tailored to Human Resources, Sports, Nonprofits, and more.

***Management Information Systems (MIS):** The management information systems (MIS) degree focuses on the business applications of information technology, data science, and cyber security. This includes the skills required in the development and implementation of various information, communication, and security-related technologies critical in all organizations.

***Marketing:** Marketing professionals identify buyers' needs and then develop and manage products/services to meet those needs. They also develop and manage the supply chain, set prices, communicate with current and potential buyers in a variety of different ways including: professional selling, advertising, and through digital communications.

[*Has online degree available]

Students are responsible for completing the requirements as given in the official degree requirements sheet for the selected major and concentration.
